

DEXA CREAM
Dexpanthenol 5%

Nourish, Protect, Heal With Every Application!

Dexa Cream

Dexpanthenol 5%

Dexa Cream contains the active ingredient Dexpanthenol in a highly absorbent, slightly fatty emulsion. Once applied, Dexpanthenol is converted in the skin into pantothenic acid (Vitamin B5), which supports the development and regeneration of the skin from within.

How Dexa Cream Works

Hydration

Penetrates deep to replenish moisture and soothe dryness.

Cooling Relief

Provides instant comfort with a refreshing effect.

Regeneration

Converts into Vitamin B5 to repair and strengthen the skin barrier.

Indications

Dexa Cream is ideal for:

- ◆ Moisturizing and caring for dry, rough, or flaky skin
- ◆ Supporting skin regeneration for minor cuts, abrasions, or irritations
- ◆ Soothing skin after minor burns, sunburns, or procedures
